2006 U.S. EXPORT STATISTICS FOR CUBA

The following is the calendar year 2006 data for exports from the United States to the Republic of Cuba relating to the *Trade Sanctions Reform and Export Enhancement Act* (TSRA) of 2000, which re-authorized the direct commercial (on a cash basis) export of food products (including branded food products) and agricultural products (commodities) from the United States to the Republic of Cuba, irrespective of purpose. The TSRA does not include healthcare products, which remain authorized by the Cuban Democracy Act (CDA) of 1992.

TSRA exports from the United States to the Republic of Cuba in 2006-US\$340,433,442.00; 2005-US\$350,218,040.00; 2004-US\$391,990,382.00; 2003-US\$256,601,471.00; 2002-US\$138,634,784.00; and 2001-(December) US\$4,318,906.00.

TSRA exports from the United States to the Republic of Cuba in 2006 were US\$340,433,442.00, placing the Republic of Cuba as 34th amongst 227 agricultural product export markets. The total value of TSRA exports from December 2001 through 2006 is **US\$1,552,562,161.00**.

The reduction in exports from the United States to the Republic of Cuba during the period 2004 through 2006 was not a result of changes in payment regulations implemented by the Office of Foreign Assets Control (OFAC) of the United States Department of the Treasury in Washington, D.C.

The following data represents the U.S. Dollar value of product exported from the United States to the Republic of Cuba under the auspice of TSRA. The data does not include transportation charges, bank charges, or other costs associated with exports from the United States to the Republic of Cuba. The government of the Republic of Cuba reports data that, according to the government of the Republic of Cuba, includes transportation charges, bank charges, and other costs. However, the government of the Republic of Cuba has not provided any verifiable data to support their data. Thus, the use of trade data reported by the government of the Republic of Cuba is suspect. The government of the Republic of Cuba has been asked to provide verifiable data, but has chosen not to do so.

Reporting Year	U.S. Dollar Value Of TSRA-Authorized Exports To Cuba	Ranking Based On Export Markets
2006	<i>US\$340,433,442.00</i>	34 th (of 227)
2005	<i>US\$350,218,040.00</i>	30 th (of 228)
2004	<i>US\$391,990,382.00</i>	25 th (of 228)
2003	<i>US\$256,901,471.00</i>	35 th (of 219)
2002	<i>US\$138,634,784.00</i>	50 th (of 226)
2001	<i>US\$4,318,906.00 (December)</i>	144 th (of 226)
Total TSRA Sales	US\$1,552,562,161.00	

To date, there is no verifiable data to support that the government of the Republic of Cuba has substantially increased the quantity and U.S. Dollar value of food products and agricultural products for the 11.2 million citizens of the Republic of Cuba. There is no verifiable data to support that the necessity of a food product ration card, issued to each citizen of the Republic of Cuba, which is to provide food for a thirty (30) day period, is providing food products for more than fourteen (14) days. This, despite statements by representatives of the government of the Republic of Cuba that the economy of the country has increased substantially during the last several years, due, although not officially confirmed, primarily to the financial largess of government of Venezuela and the government of the People's Republic of China.

In January 2007, representatives of Republic of Cuba government-operated Empresa Cubana Importadora Alimentos (Alimport), under the auspice of the Ministry of Foreign Trade of Cuba (MINCEX), informed representatives of United States-based companies that Alimport would significantly reduce purchases from United States-based companies due to a lack of effort (and, presumably, success) by United States-based companies in obtaining changes to United States laws and United States regulations. Alimport has continued a policy, commenced in 2003, whereby Alimport decreases purchases from a United States-based company if Alimport perceives a lack of lobbying for changes in United States laws and United States regulations.

Throughout 2005, representatives of Alimport reported that TSRA-authorized purchases by Alimport in 2005 would be substantially less than purchases in 2004. However, in November 2005, a representative of Alimport reported that purchases by Alimport in 2005 would at least equal, but were expected to exceed TSRA-authorized purchases by Alimport in 2004. However, the representative of Alimport reported that the purchase values included transportation charges, bank charges, finance charges, and other costs, all of which are not independently verifiable.

The primary reasons for the reduction in exports to the Republic of Cuba are: **1)** efforts by the government of the Republic of Cuba to increase the motivation of United States-based companies, organizations; state and local government representatives; and Members of the United States Congress to be more visible in their lobbying efforts for changes in United States policy, law, and regulations. **2)** financial largess of the government of Venezuela lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. **3)** financial largess of the government of the People's Republic of China lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. **4)** re-emergences and/or continuations of import relationships (barter, substantial credits, political motivation) with the governments of Brazil, Argentina, Vietnam, Mexico, Canada, and France amongst other countries.

The following are the ten largest (U.S. Dollar value) agricultural product exports from the United States to the Republic of Cuba in 2006, 2005, 2004, 2003, 2002, and 2001 under provisions of TSRA:
