ECONOMIC EYE ON CUBA[©]

October 2015

Food/Ag Exports Decrease 44% Thus Far In 2015 Compared With 2014

Cuba Ranks 61st of 224 Food/Ag Export Markets Thus Far In 2015

US\$663,816.00 In Healthcare Product Exports

U.S. Port Export Data

Updated Speaking & Events Schedule

FOOD/AG EXPORTS MONTHLY DECREASE 84%- Exports of food products & agricultural products from the United States to the Republic of Cuba in August 2015 were US\$2,254,957.00 (only soybeans) compared to US\$14,369,461.00 in August 2014. The soybeans were sold by Salisbury, Maryland-based Perdue Grain and Oilseed. Poultry exports have decreased due to avian flu issues; however, exports are expected to increase during the month of October 2015.

The following contains information on exports from the United States to the Republic of Cuba- products within the Trade Sanctions Reform and Export Enhancement Act (TSREEA) of 2000, Cuban Democracy Act (CDA) of 1992, and regulations implemented (1992 to present) for other products by the Office of Foreign Assets Control (OFAC) of the United States Department of the Treasury and Bureau of Industry and Security (BIS) of the United States Department of Commerce.

The TSREEA re-authorized the direct commercial (on a cash basis) export of food products (including branded food products) and agricultural products (commodities) from the United States to the Republic of Cuba, irrespective of purpose. The TSREEA does not include healthcare products, which remain authorized by CDA.

The data represents the U.S. Dollar value of product exported from the United States to the Republic of Cuba under the auspice of TSREEA. The data does not include transportation charges, bank charges, or other costs associated with exports from the United States to the Republic of Cuba. The government of the Republic of Cuba reports unverifiable data that includes transportation charges, bank charges, and other costs.

2015 Ranking	Product	U.S. Dollar Value	% Of Total U.S. Exports To Cuba
1	Frozen Chicken	US\$63,284,007.00	50.8%
2	Soybean Oil Cake	US\$29,843,538.00	23.9%
3	Soybean Flour/Meals	US\$11,157,300.00	8.9%

Total		US\$9,986,629.00

Donated items are neither included in TSREEA nor CDA calculations. These items are generally delivered to the Republic of Cuba using regularly-scheduled air charter or containers on vessels; does not include personal deliveries (by travelers on charter flights and through third countries).

Donations (food, healthcare, clothing, reading materials, etc.)	
Reporting Period	U.S. Dollar Value
2015	US\$3,162,862.00

If the government of the Republic of Cuba views the changes to United States regulations of December 2014 as a means to influence the political process in the United States, likely will be meaningful purchases of products under provisions of the TSREEA and CDA and telecommunications equipment; and building materials/supplies and agricultural equipment and supplies to and through authorized entities.

NOTE: There are meaningful exports of products from the United States to the Republic of Cuba that remain unreported/undocumented; the export channels used for these exports include direct charter flights from the United States to the Republic of Cuba and using third-country regularly-scheduled airlines. Products include, but are not limited to, welding equipment, power tools, electronic equipment, printers, cooking supplies, medical supplies, household implements, etc., taken as baggage (checked and carry-on) by passengers.

If the government of the Republic of Cuba permits the implementation of the changes to United States regulations, which authorize the export of products to support private enterprises/co-operatives, some of the products will be exported using channels that are subject to reporting requirements.

The government of the Republic of Cuba may determine greater leverage exists from not increasing purchasing levels as a means of encouraging those impacted United States-based parties to seek further regulatory and legislative changes. Members of Congress, Governors, and other political actors will increase their visits to the Republic of Cuba as media coverage of the visits will be generous. However, if too many visitors return without commitments for purchases of products manufactured in their respective states, the media's generosity will lessen.... as may that of the political actors and, eventually, the companies.

With Venezuela's increasing commercial and economic challenges, the government of the Republic Cuba has less financial support, and other actors (Russia, China, Iran, etc.) do not have the focus to replace Venezuela as benefactors of significance. Thus, the government of the Republic of Cuba may be entering a period of cautiousness and a full-on re-engagement with the United States may become problematic while the policy of the government of the United States remains to seek commercial, economic and political change within the Republic of Cuba.

The primary reasons for the cumulative reduction in United States exports to the Republic of Cuba **1)** lack of foreign

exchange due to commercial and economic decisions of the government of the Republic of Cuba which lessen its ability to earn foreign exchange. 2) financial largess of the government of Venezuela lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. 3) financial largess of the government of the People's Republic of China lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. 4) re-emergence and/or continuation of import relationships (barter, substantial credits, political motivation) with the governments of Brazil, Argentina, Vietnam, Mexico, Spain, Mexico, Canada, Russia, Iran, New Zealand, and France amongst other countries. 5) preference to purchase products from government-controlled entities, which provide more favorable payment terms and less publicity when those payment terms are not honored, which is expected given the lack of foreign exchange of government of the Republic of Cuba. 6) efforts (which had been successful, but had lessened in their effectiveness) by the government of the Republic of Cuba to increase the motivation of United States-based companies, organizations; state and local government representatives; and Members of the United States Congress to be more visible in their lobbying efforts for changes in United States policy, law, and regulations.

Government of Vietnam-operated Vinafood 1 and Vinafood 2 have provided payment terms to Republic of Cuba government-operated Empresa Cubana Importadora Alimentos (Alimport), under the auspice of the Ministry of Foreign Trade of Cuba (MINCEX), of up to two years to pay for rice (25% to 30% broken). United States producers can provide this product; payment terms, however, without the use of government programs, would generally not exceed six months, with most companies requiring 30 days to ninety days.

The reduction in exports from the United States to the Republic of Cuba is not the result of changes in payment regulations implemented by the OFAC during later years of the Bush Administration, which had permitted an expansive definition of payment terms. The payment regulations were again made expansive in January 2015.

Exports from the United States to the Republic of Cuba under provisions of TSREEA or CDA are transported from the United States to the Republic of Cuba either by air or by water. There are forty-seven (47) districts in the United States. While the reporting district is Mobile, Alabama, the shipping ports include Mobile, Alabama; Pascagoula, Mississippi; and Gulfport, Mississippi. While the reporting district is Miami, Florida, the shipping port does not include Miami, Florida, but does include Jacksonville, Florida, and Port Manatee, Florida; and can include airline charter/airline cargo from Miami International Airport. The New York reporting district includes ports in New Jersey; and can include John F. Kennedy International Airport (charter flights). The Buffalo, New York, reporting district means that the products were transported by ground and then to the Republic of Cuba. The Los Angeles, California, reporting district means that some the products were transported through Los Angeles International Airport (charter flights). The following Districts reported exports to the Republic of Cuba in 2014/2015:

Districts From Where TSREEA Products Exported				
Pork	Miami, FL			
Chicken	Miami, FL	Mobile, AL	New Orleans, LA	Tampa, FL
Turkey	Charleston, SC			
Corn	New Orleans, LA			
Soybeans/Soybean Flour	Norfolk, VA	Savannah, GA		
Breads/Biscuits/Cookies	Houston/Galveston TX	Miami, FL		
Soups	Houston/Galveston TX			
Soybean Oil Cake	New Orleans, LA	Savannah, GA		
Animal Feeds	Buffalo, NY	New Orleans, LA	Tampa, FL	
Herbicides	Laredo, Texas			

Districts From Where CDA Products Exported					
Miami, FL	New York, NY	Chicago, IL	Los Angeles, CA	Cleveland, OH	San Juan, PR

Alimport projects that it will import food products and agricultural products valued at a combined US\$2.2 billion in 2015.

The government of the Republic of Cuba reported at Alimport purchased approximately US\$2 billion in food products and agricultural products in 2014 and that the country imports approximately 60% to 70% its food product and agricultural requirements.

The government of the Republic of Cuba reported spending US\$2.554 billion in 2008 to import 3.423 metric tons of food products and agricultural products. Using the actual value for U.S. Dollar food and agricultural product exports to the Republic of Cuba, the United States was the source for 27% of the Republic of Cuba's food and agricultural product imports in 2008.

The government of the Republic of Cuba reported spending US\$1.47 billion in 2007 to import 3.423 million metric tons of food products and agricultural products. The United States was the source for 29% of the Republic of Cuba's food and agricultural product imports in 2007.

A primary reason for the increase in U.S. Dollar value of purchases in 2008 and 2007 by the government of the Republic of Cuba from United States-based companies was the increase in prices in for commodities purchased from the United States. There was a meaningful increase in the quantity of some commodities. For 2008, there was a 61% increase in the U.S. Dollar value of food products and agricultural products from the United States to the Republic of Cuba compared to 2007.

The government of the Republic of Cuba has decreased the quantity and U.S. Dollar value of food products and agricultural products imported from throughout the world for the 11.4 million citizens of the Republic of Cuba. There is no verifiable data to support that the necessity of a food product ration card, issued to each citizen to provide food for a thirty (30) day period is providing food products for more than fourteen (14) days. This, despite statements by representatives of the government of the Republic of Cuba that the economy of the country has increased substantially during the last several years, due, although not officially confirmed, primarily to the financial largess of government of Venezuela and the government of the People's Republic of China.

In May 2007 and June 2007, representatives of Alimport informed representatives of United States-based companies that Alimport expected that the U.S. Dollar value of TSRA-authorized purchases from the United States in 2007 would exceed the U.S. Dollar value of TSRA-authorized purchases from the United States in 2006.

In January 2007, representatives of Alimport informed representatives of United States-based companies that Alimport would significantly reduce purchases from United States-based companies due to a lack of effort (and, presumably, success) by United States-based companies in obtaining changes to United States laws and United States regulations. Alimport continued a policy, commenced in 2003, whereby Alimport decreased purchases from

a United States-based company if Alimport perceived a lack of lobbying for changes in United States laws and United States regulations. Throughout 2005, representatives of Alimport reported that TSRA-authorized purchases by Alimport in 2005 would be substantially less than purchases in 2004. In November 2005, a representative of Alimport reported that purchases by Alimport in 2005 would at least equal, but were expected to exceed TSRA-authorized purchases by Alimport in 2004. The representative of Alimport reported that the purchase values included transportation charges, bank charges, finance charges, and other costs, which are not verifiable.
