ECONOMIC EYE ON CUBA©

April 2017

February 2017 Exports To Cuba Increases .26% Or 2%- 1

Healthcare Product Exports- 2

Humanitarian Donations- 3

Obama Administration Initiatives Product Exports- 3

U.S. Port Export Data- 14

FEBRUARY FOOD/AG EXPORTS INCREASE .26% OR 2%- Exports of food products & agricultural commodities from the United States to the Republic of Cuba in February 2017 were US\$18,145,564.00 (or US\$17,893,564.00) compared to US\$17,847,747.00 in February 2016 and US\$13,488,136.00 in February 2015. The difference of US\$252,000.00 references 157.8 metric tons of rice reported as exported to the Republic of Cuba by the United States Department of Commerce but not reported as exported to the Republic of Cuba in port (Houston, Texas, District) export data. [*Report will be adjusted as new information is available*]. February 2017 exporters included: Wayzata, Minnesota-based Cargill (corn); Atlanta, Georgia-based AJC International (poultry); Atlanta, Georgia-based Intervision Foods (poultry); Bedford, Massachusetts-based Sellari Enterprises (poultry); Chattanooga, Tennessee-based Koch Foods of Chattanooga (poultry); New York, New York-based Globex International (poultry); Wellesley, Massachusetts-based Grove Services (poultry); Salisbury, Maryland-based Perdue Agribusiness (poultry); and Miami, Florida-based Sevino del Bene SpA (unreported).

The following contains information on exports from the United States to the Republic of Cuba- products within the Trade Sanctions Reform and Export Enhancement Act (TSREEA) of 2000, Cuban Democracy Act (CDA) of 1992, and regulations implemented (1992 to present) for other products by the Office of Foreign Assets Control (OFAC) of the United States Department of the Treasury and Bureau of Industry and Security (BIS) of the United States Department of Commerce.

The TSREEA re-authorized the direct commercial (on a cash basis) export of food products (including branded food products) and agricultural commodities from the United States to the Republic of Cuba, irrespective of purpose. The TSREEA does not include healthcare products, which remain authorized and regulated by the CDA.

The data represents the U.S. Dollar value of product exported from the United States to the Republic of Cuba under the TSREEA. The data does not include transportation charges, bank charges, or other costs associated with exports; the government of the Republic of Cuba reports unverifiable data that includes transportation charges, bank charges, and other costs.

| February 2017 Ranking | Product | U.S. Dollar Value | % Of Total U.S. Exports To Cuba |
|------------------------------|--|--------------------------|--|
| 1 | Chicken Leg Quarters (frozen) | US\$6,649,908.00 | 36.6% |
| 2 | Corn | US\$4,846,770.00 | 26.7% |
| 3 | Soybeans | US\$2,864,919.00 | 15.8% |
| 4 | Chicken Legs, Frozen | US\$1,808,147.00 | 10.0% |
| 5 | Chicken, Meat, Frozen | US\$676,894.00 | 3.7% |
| 6 | Cookies (sweet biscuits) | US\$385,656.00 | 2.1% |
| 7 | Chickens, Whole | US\$305,030.00 | 1.7% |
| 8 | Rice | US\$252,000.00 | 1.4% |
| 9 | Chocolate Confectionary, Retail | US\$81,432.00 | .40% |
| 10 | Beer | US\$72,324.00 | .40% |
| | <i>Total Value Of 10 Largest Exports To Cuba</i> | <i>US\$17,943,080.00</i> | |
| | <i>Total U.S. Exports To Cuba</i> | <i>US\$18,145,564.00</i> | |

| Total | US\$19,011,730.00 |

HUMANITARIAN DONATIONS- Donated items are neither included in TSREEA nor CDA calculations. These items are generally delivered to the Republic of Cuba using air carriers or containers on vessels; do not include personal deliveries (by travelers on flights and through third countries). A substantial quantity and U.S. Dollar value of items categorized as “humanitarian” are transported from the United States to the Republic of Cuba using air carriers; thus, the information is not documented.

| Donations (food, healthcare, clothing, reading materials, etc.) | |

| 2015 | US\$4,619,588.00 |
| 2014 | US\$939,705.00 |

U.S.-Cuba Trade and Economic Council, Inc.

OBAMA ADMINISTRATION INITIATIVES PRODUCT EXPORTS- In 2015 and in 2016, the OFAC and BIS expanded the list of products that may be exported from the United States and from third countries of the Republic of Cuba. Primarily at this time items for hotel and airline operations.

NOTE: There are unreported/undocumented exports of products from the United States to the Republic of Cuba; channels included direct charter flights (now regularly-scheduled flights), third-country regularly-scheduled airlines, and cargo vessels. Products include, but are not limited to, welding equipment, power tools, electronic equipment, printers, cooking supplies, medical supplies, household implements, etc., taken as baggage (checked and carry-on) by passengers.

If the government of the Republic of Cuba authorizes implementation of the changes to United States regulations which permit the export of products to support private enterprises/co-operatives, the products exported will increase the usage of delivery channels subject to data reporting requirements.

If the government of the Republic of Cuba views the changes to United States regulations as a means to influence the political process in the United States, likely will be increases in purchases of products under provisions of the TSREEA, CDA and Obama Administration Initiatives including telecommunications equipment; building materials/supplies and agricultural equipment and supplies to and through authorized entities.

The government of the Republic of Cuba may determine greater leverage exists from not increasing purchasing levels as a means of encouraging impacted United States-based parties to seek further regulatory and legislative changes. Members of Congress, Governors, and other political actors will increase their visits to the Republic of Cuba as media coverage will be generous. However, if too many visitors return without commitments for purchases of products manufactured in their respective states, the media's generosity will lessen.... as may that of the political actors and, eventually, the companies. With Venezuela's increasing commercial and economic challenges, the government of the Republic Cuba has less financial support, and other actors (Russia, China, Brazil, Iran, etc.) do not have the focus to replace Venezuela as benefactors of significance. Thus, the government of the Republic of Cuba may be entering a period of cautiousness and a full-on re-engagement with the United States may become problematic while the policy of the government of the United States remains to seek commercial, economic and political change within the Republic of Cuba.

The primary reasons for the cumulative reduction in United States exports to the Republic of Cuba **1)** lack of foreign exchange due to commercial and economic decisions of the government of the Republic of Cuba which lessen its ability to earn foreign exchange. **2)** financial largess of the government of Venezuela lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. **3)** financial largess of the government of the People's Republic of China lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. **4)** re-emergence and/or continuation of import relationships (barter, substantial credits, political motivation) with the governments of Brazil, Argentina, Vietnam, Mexico, Spain, Mexico, Canada, Russia, Iran, New Zealand, and France amongst other countries. **5)** preference to purchase products from government-controlled entities, which provide more favorable payment terms and less publicity when payment terms are not honored, which is expected given the lack of foreign exchange of the government of the Republic of Cuba. **6)** efforts (which had been successful, but had lessened in their effectiveness) by the government of the Republic of Cuba to increase the motivation of United States-based companies, organizations; state and local government representatives; and Members of the United States Congress to be more visible in their lobbying efforts for changes in United States policy, law, and regulations.

Government of Vietnam-operated Vinafood 1 and Vinafood 2 have provided payment terms to Republic of Cuba government-operated Alimport of two (2) years to pay for rice (25% to 30% broken). United States producers can provide this product; payment terms, however, without the use of government programs, would be cash-on-delivery to 30 days; and for credit-worthy customers, generally not exceed sixty days to ninety days.

U.S.-Cuba Trade and Economic Council, Inc.

The reduction in exports from the United States to the Republic of Cuba is not the result of changes in payment regulations implemented by the OFAC during later years of the Bush Administration, which had permitted an expansive definition of payment terms. The payment regulations were again made expansive in January 2015.

Alimport reported that it expected to import approximately US\$1.8 billion in food products and agricultural commodities in 2017, compared with approximately US\$1.8 billion in 2016, US\$1.8 billion in 2015, and US\$2.55 billion in 2014. Alimport reported that the country imports approximately 70% to 80% its food product and agricultural commodity requirements.

The government of the Republic of Cuba reported spending US\$2.554 billion in 2008 to import 3.423 metric tons of food products and agricultural commodities. Using the actual value for U.S. Dollar food products and agricultural commodity exports to the Republic of Cuba, the United States sourced 27% of the Republic of Cuba's food product and agricultural commodity imports in 2008.

The government of the Republic of Cuba reported spending US\$1.47 billion in 2007 to import 3.423 million metric tons of food products and agricultural products. The United States was the source for 29%.

A primary reason for the increase in U.S. Dollar value of purchases in 2008 and 2007 by the government of the Republic of Cuba from United States-based companies was the increase in prices in for commodities purchased from the United States. There was a meaningful increase in the quantity of some commodities. For 2008, there was a 61% increase in the U.S. Dollar value of food products and agricultural products from the United States to the Republic of Cuba compared to 2007.

The government of the Republic of Cuba has increased and decreased the quantity and U.S. Dollar value of food products and agricultural products imported from throughout the world for the 11.4 million citizens of the Republic of Cuba. There is no verifiable data to support that the necessity of a food product ration card, issued to each citizen to provide food for a thirty (30) day period is providing food products for more than fourteen (14) days. This, despite statements by representatives of the government of the Republic of Cuba that the economy of the country has increased substantially during the last several years, due, although not officially confirmed, primarily to the financial largess of government of Venezuela and the government of the People's Republic of China.

In May 2007 and June 2007, representatives of Alimport informed representatives of United States-based companies that Alimport expected that the U.S. Dollar value of TSRA-authorized purchases from the United States in 2007 would exceed the U.S. Dollar value of purchases from the United States in 2006.

In January 2007, representatives of Alimport informed representatives of United States-based companies that Alimport would significantly reduce purchases from United States-based companies due to a lack of effort (and, presumably, success) by United States-based companies in obtaining changes to United States laws and United States regulations. Alimport continued a policy, commenced in 2003, whereby Alimport decreased purchases from a United States-based company if Alimport perceived a lack of lobbying for changes in United States laws and United States regulations. Throughout 2005, representatives of Alimport reported that TSRA-authorized purchases by Alimport in 2005 would be substantially less than purchases in 2004. In November 2005, a representative of Alimport reported that purchases by Alimport in 2005 would at least equal, but were expected to exceed TSRA-authorized purchases by Alimport in 2004. The representative of Alimport reported that the purchase values included transportation charges, bank charges, finance charges, and other costs, which are not verifiable.

U.S. PORT DATA- Exports from the United States to the Republic of Cuba under provisions of TSREEA, CDA and Obama Initiatives are transported by air or by water. There are fifty (50) districts in the United States. If the reporting district is Mobile, Alabama, the shipping ports include Mobile, Alabama; Pascagoula, Mississippi; and Gulfport, Mississippi. If the reporting district is Miami, Florida, the shipping port does not include Miami, Florida, but does include Jacksonville, Florida, and Port Manatee, Florida; and can include airline charter/cargo from Miami International Airport. New York reporting district includes ports in New Jersey; and can include John F. Kennedy International Airport (charter flights). Buffalo, New York, reporting district means products were transported by ground and then to the Republic of Cuba. Los Angeles, California, reporting district means that some the products were transported through Los Angeles International Airport (charter flights).

| Districts From Where TSREEA Products Exported | | | | | |
