## ECONOMIC EYE ON CUBA©

January 2024

**November 2023 Ag/Food Exports To Cuba Decrease 13.4%- 1**

**50<sup>th</sup> Of 227 November 2023 U.S. Food/Ag Export Markets- 2**

**Year-To-Year Exports Increase 2.8%- 2**

**Cuba Ranked 53<sup>rd</sup> Of 227 2023 U.S. Ag/Food Export Markets- 2**

**November 2023 Healthcare Product Exports US\$0.00- 2**

**November 2023 Humanitarian Donations US\$2,917,805.00- 3**

**Obama Administration Initiatives Exports Continue- 3**

**U.S. Port Export Data- 19**

**NOVEMBER 2023 FOOD/AG EXPORTS TO CUBA DECREASE 13.4%-** Exports of food products and agricultural commodities from the United States to the Republic of Cuba in November 2023 were US\$28,643,992.00 compared to US\$33,085,677.00 in November 2022 and US\$27,699,046.00 in November 2021. *Exporters* in November 2023 included (but not limited to): Atlanta, Georgia-based **AJC International** (poultry, bovine); Atlanta, Georgia-based **Intervision Foods** (poultry, bovine); Atlanta, Georgia-based **Gerber Agri International** (poultry); Miami, Florida-based **Katapulk Marketplace** (foodstuffs); Miami, Florida-based **Arcross Group Corporation** (poultry); Gainesville, Florida-based **Koch Foods** (poultry, bovine); Florida-based **Aparicio Cargo Travel Services** (poultry, salt, foodstuffs); Miami, Florida-based **Pearl Merchandising And Distribution** (fruit, coffee, nuts, juice); Hialeah, Florida-based **Flash Kingz** (poultry, bovine, mushroom/plants); Miami, Florida-based **Dancay** (coffee); Naples, Florida-based **Tuambia** (fish); Miami, Florida-based **Three Star Investment** (poultry); Miami, Florida-based **Caribbean Express Trading** (poultry); Hialeah, Florida-based **OK International** (eggs); Mississauga, Canada-based **Gulcan Enterprise** (wafers, fish); Miami, Florida-based **Up Level Investment** (cotton, vegetables); Fort Lauderdale, Florida-based **Del Prado Trading** (fish, vegetables, sugar); Miami, Florida-based **Jo Business** (poultry); Miami Beach, Florida-based **Just 90 Miles** (poultry); Chattanooga, Tennessee-based **Koch Foods** (poultry); Miami, Florida-based **Miranda Export** (poultry); Miami, Florida-based **Jam 4** (bovine); Miami, Florida-based **Savvy World** (butter, fish); Miami, Florida-based **Tree Logistics** (fruit); Miami, Florida-based **Cugranca** (coffee); Miami, Florida-based **Almendares Courier Solution** (fish); Miami, Florida-based **Lions Capital** (oil seeds).

The following contains information on exports from the United States to the Republic of Cuba- products within the Trade Sanctions Reform and Export Enhancement Act (TSREEA) of 2000, Cuban Democracy Act (CDA) of 1992, and regulations implemented (1992 to present) for other products by the Office of Foreign Assets Control (OFAC) of the United States Department of the Treasury and Bureau of Industry and Security (BIS) of the United States Department of Commerce.

The TSREEA re-authorized the direct commercial (on a cash basis) export of food products (including branded food products) and agricultural commodities from the United States to the Republic of Cuba, irrespective of purpose. The TSREEA does not include healthcare products, which remain authorized and regulated by the CDA.

The data represents the U.S. Dollar value of product exported from the United States to the Republic of Cuba under the TSREEA. The data does not include transportation charges, bank charges, or other costs associated with exports; the government of the Republic of Cuba reports unverifiable data that includes transportation charges, bank charges, and other costs.

November 2023 Ranking	Product	U.S. Dollar Value	% Of Total U.S. Exports To Cuba
1	Chicken Meat (Frozen)	US\$9,914,916.00	34.6%
2	Chicken Leg Quarters (Frozen)	US\$7,031,653.00	24.5%

## U.S.-Cuba Trade and Economic Council, Inc.

3	Chicken Legs (Frozen)	US\$3,179,675.00	11.1%

**HEALTHCARE PRODUCT EXPORTS-** Exports of healthcare products (medical equipment, medical instruments, medical supplies, pharmaceuticals) to the Republic of Cuba are subject to provisions of the Cuban Democracy Act (CDA) of 1992, which require end use-verification, but are not subject to cash-in-advance payment requirements. Exports have included: Medicaments (penicillin and insulin); Dentifrices (toothpastes); Laboratory reagents; Ultrasonic scanning equipment; Artificial limbs; Medical appliances; Surgical appliances (dental); Ophthalmic (eye); Cannulae (tubing) and gelatin capsules. Administrative changes to OFAC and BIS regulations have permitted some healthcare products for export not using provisions of the CDA.

Medical Equipment, Medical Instruments, Medical Supplies & Pharmaceutical Exports Under 1992 CDA	
2023	US\$781,028.00

**HUMANITARIAN DONATIONS-** Donated items are neither included in TSREEA nor CDA calculations. These items are generally delivered to the Republic of Cuba using air carriers or containers on vessels; do not include personal deliveries (by travelers on flights and through third countries). A meaningful quantity and U.S. Dollar value of items categorized as “*humanitarian*” are transported from the United States to the Republic of Cuba by passengers on authorized air carriers; thus, the information is not documented.

**OBAMA-BIDEN ADMINISTRATION INITIATIVES EXPORTS CONTINUE TO INCREASE-** In 2015 and in 2016, the OFAC and BIS expanded the list of products and services authorized for export from the United States and from third countries to the Republic of Cuba. The Trump-Pence Administration (2017-2021) did not demonstrably interfere with the Obama-Biden Administration (2009-2017) initiatives relating to product exports, but did relating to service exports. The Obama-Biden Administration focus was upon products (non-durable, durable, and consumable) to entities not affiliated with the government of the Republic of Cuba, while the government of the Republic of Cuba generally prohibited these exports and when permitted substantially restricted their activities. There was one United States company with two hotel management contracts, United States airlines servicing United States-Republic of Cuba routes, a company with a power generation contract, and two United States companies with agricultural equipment distribution centers.

- In 2017, **Deere & Company** (2023 revenues approximately US\$61.3 billion) established a distribution center in the Republic of Cuba, joining San Juan, Puerto Rico-based *RIMCO*, the Republic of Cuba distributor for Irving, Texas-based **Caterpillar Inc.** (2023 revenues US\$66.5 billion) established the same year. At the time, neither Deere & Company nor Caterpillar issued media releases or posted information on their respective Internet sites.

## U.S.-Cuba Trade and Economic Council, Inc.

- Since November 2017, Deere & Company delivered more than US\$800,000.00 in agricultural equipment to the Republic of Cuba for use at its distribution center. Antioch, Tennessee-based Wirtgen America, Inc., a subsidiary of Windhagen, Germany-based *Wirtgen Group* (2020 revenues approximately US\$3 billion), a construction equipment machinery subsidiary (acquired in 2017) of Deere & Company has also delivered products to the Republic of Cuba. *RIMCO* continues to deliver equipment for use at its distribution center in the Republic of Cuba, including excavators, backhoes, graders, scrapers, bulldozers, railway fixtures, and signaling equipment, valued at more than US\$4 million since December 2018. John Deere Financial Services was to provide payment terms/financing for the exports, primarily Series 5000 (price range US\$25,000.00 to US\$80,000.00) with a limited quantity of Series 7000 (price range US\$219,000.00 to US\$280,000.00). According to the company, several hundred tractors, parts and accessories may be exported from the United States to the Republic of Cuba during the next four years, with the first deliveries (for testing and evaluation) scheduled for mid-November 2017. The potential value of the several hundred products exported from the United States to the Republic of Cuba that would be financed could range from US\$9 million to US\$30 million. John Deere Financial Services has not commented as to whether the product sales goals have been achieved or if there have been issues relating to the receipt of payments. Caterpillar has not disclosed if the company has provided payment terms for its products exported to the Republic of Cuba.
- Since December 2017, Boston, Massachusetts-based **General Electric** (GE; 2022 revenues approximately US\$76.5 billion) delivered from the United States to the Republic of Cuba “*parts for steam turbines*” valued at more than US\$21 million. Some of the parts traveled from Atlanta, Georgia, to Port Everglades, Florida, then to Port Mariel in the Republic of Cuba. GE is the largest (by revenue) United States-based industrial company to have engaged with the Republic of Cuba. Although GE has not issued a media release relating to the project in the Republic of Cuba, in 2017 the government of the Republic of Cuba confirmed in a PowerPoint presentation used by the Embassy of the Republic of Cuba in Washington DC that the company was providing parts and equipment for a power plant. The total value of the project has not been reported. The Obama Administration first authorized the transactions by GE as primarily advancing benefit to the citizens of the Republic of Cuba rather than to the government of the Republic of Cuba. This type of transaction was and remains licensable (general or specific) through the OFAC and BIS. In November 2015, GE purchased for approximately US\$10.6 billion the power and grid division of Paris, France-based **Alstom** (2018 revenues approximately US\$8 billion). In 2016, GE commenced a power generation project in the Republic of Cuba resulting, in part, from a relationship between Alstom and the Republic of Cuba prior to the 2015 acquisition by GE of the power and grid division of Alstom, which had exported products to the Republic of Cuba. On 31 March 1971, GE certified a claim against the Republic of Cuba in the amount of US\$5,870,436.86 through the United States Foreign Claims Settlement Commission (**USFCSC**) within the United States Department of Justice. Interest accrued at 6% per annum from the respective date(s) of loss to the date of settlement.

**NOTE:** There are unreported/undocumented exports of products from the United States to the Republic of Cuba; channels included direct charter flights (regularly-scheduled flights as of the third quarter of 2016, suspended during the Trump-Pence Administration and then reestablished during the Biden-Harris Administration), third-country regularly-scheduled airlines, and cargo vessels. Products include, but are not limited to, welding equipment, power tools, electronic

## U.S.-Cuba Trade and Economic Council, Inc.

equipment, printers, cooking supplies, medical supplies, household implements, etc., taken as baggage (checked and carry-on) by passengers. If the government of the Republic of Cuba authorizes implementation of the changes to United States regulations which permit the export of products to support private enterprises/co-operatives, the products exported will increase the usage of delivery channels subject to data reporting requirements.

If the government of the Republic of Cuba views changes to United States statutes and regulations as a means to influence the political process in the United States, likely increases in purchases of products under provisions of the TSREEA, CDA, Obama-Biden Administration and Biden-Harris Administration initiatives including telecommunications equipment; building materials/supplies and agricultural equipment and supplies to and through authorized entities. The government of the Republic of Cuba has often determined that greater leverage exists from not increasing purchasing levels as a means of encouraging impacted United States- based parties to seek further regulatory and legislative changes. Members of Congress, governors, and other political actors have visited the Republic of Cuba as media coverage was generous. With Venezuela's commercial and economic challenges, the government of the Republic Cuba has less financial support, and other actors (Russia, China, Brazil, Iran, etc.) do not have the focus to replace Venezuela as benefactors of significance. The government of the Republic of Cuba continues a period of cautiousness and full-on re-engagement with the United States remains problematic while the policy of the government of the United States remains to seek commercial, economic, and political change within the Republic of Cuba.

The primary reasons for fluctuations in United States exports to the Republic of Cuba **1)** lack of foreign exchange due to commercial and economic decisions of the government of the Republic of Cuba which lessen its ability to earn foreign exchange. **2)** financial largess of the government of China, Russia, and Venezuela lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations; financial benefits from Venezuela have continued to decrease. **3)** re-emergence and/or continuation of import relationships (barter, financing, political motivation) with the governments of Brazil, Argentina, Vietnam, Mexico, Spain, Canada, Russia, Iran, New Zealand, and France amongst other countries. **4)** preference to purchase products from government-controlled entities, which provide more favorable payment terms and less publicity when payment terms are not honored. **5)** efforts (which had been successful but had lessened in their effectiveness) by the government of the Republic of Cuba to increase the motivation of United States-based companies, organizations; state and local government representatives; and Members of the United States Congress to be more visible in their lobbying efforts for changes in United States policy, law, and regulations.

Government of Vietnam-operated Vinafood 1 & Vinafood 2 have provided payment terms to Republic of Cuba government-operated Alimport of two years to pay for rice (25%/30% broken). United States producers can provide product; payment terms absent government programs would be cash to 30 days; for credit-worthy customers, generally sixty days to ninety days. The reduction in exports from the United States to the Republic of Cuba is not the result of changes in payment regulations implemented by the OFAC during later years of the Bush Administration, which had permitted an expansive definition of payment terms. The payment regulations were again made expansive in January 2015.

Alimport reported importing approximately US\$1.8 billion in food products and agricultural commodities in 2017, compared with approximately US\$1.8 billion in 2016, US\$1.8 billion in 2015, and US\$2.55 billion in 2014. Alimport reported that the country imports approximately 70%

## U.S.-Cuba Trade and Economic Council, Inc.

to 80% its food product and agricultural commodity requirements. The Republic of Cuba reported spending US\$2.554 billion in 2008 to import 3.423 metric tons of food products and agricultural commodities. Using the actual value for U.S. Dollar food products and agricultural commodity exports to the Republic of Cuba, the United States sourced 27% of the Republic of Cuba's food product and agricultural commodity imports in 2008. The Republic of Cuba reported spending US\$1.47 billion in 2007 to import 3.423 million metric tons of food products and agricultural products. The United States was the source for 29%.

A primary reason for the increase in U.S. Dollar value of purchases in 2008 and 2007 by the government of the Republic of Cuba from United States-based companies was the increase in prices in for commodities purchased from the United States. There was a meaningful increase in the quantity of some commodities . For 2008, there was a 61% increase in the U.S. Dollar value of food products and agricultural products from the United States to the Republic of Cuba compared to 2007.

The government of the Republic of Cuba has increased and decreased the quantity and U.S. Dollar value of food products and agricultural products imported from throughout the world for the 11.4 million citizens of the Republic of Cuba. There is no verifiable data to support that the necessity of a food product ration card, issued to each citizen to provide food for a thirty (30) day period is providing food products for more than fourteen (14) days. This, despite statements by representatives of the government of the Republic of Cuba that the economy of the country has increased substantially during the last several years, due, although not officially confirmed, primarily to the financial largess of government of Venezuela and the government of the People's Republic of China.

In May 2007 and June 2007, representatives of Alimport informed representatives of United States-based companies that Alimport expected that the U.S. Dollar value of TSREEA-authorized purchases from the United States in 2007 would exceed the U.S. Dollar value of purchases from the United States in 2006.

In January 2007, representatives of Alimport informed representatives of United States-based companies that Alimport would significantly reduce purchases from United States-based companies due to a lack of effort (and, presumably, success) by United States-based companies in obtaining changes to United States laws and United States regulations. Alimport continued a policy, commenced in 2003, whereby Alimport decreased purchases from a United States-based company if Alimport perceived a lack of lobbying for changes in United States laws and United States regulations. Throughout 2005, representatives of Alimport reported that TSREEA-authorized purchases by Alimport in 2005 would be substantially less than purchases in 2004. In November 2005, a representative of Alimport reported that purchases by Alimport in 2005 would at least equal, but expected to exceed TSREEA-authorized purchases by Alimport in 2004. The representative of Alimport reported that the purchase values included transportation charges, bank charges, finance charges, and other costs, which are not verifiable.

**U.S. PORT DATA-** Export excerpts from the United States to the Republic of Cuba under provisions of TSREEA, CDA and Obama Initiatives are transported by air or by water. There are fifty (50) districts in the United States. If the reporting district is Mobile, Alabama, the shipping ports include Mobile, Alabama; Pascagoula, Mississippi; and Gulfport, Mississippi. If the reporting district is Miami, Florida, the shipping port does not include Miami, Florida, but does include Jacksonville, Florida, and Port Manatee, Florida; and can include airline charter/cargo from Miami International Airport. New York reporting district includes ports in New Jersey; and can include John F. Kennedy International Airport (charter flights). Buffalo, New York, reporting district means products were transported by ground and then to the Republic of Cuba. Los Angeles, California, reporting district means that some the products were transported through Los Angeles International Airport (charter flights).
